

DOLPHIN STORAGE SOLUTIONS

COMPLETE STORAGE
SOLUTIONS

**DOLPHIN
STORAGE SOLUTIONS**

INTRODUCTION

We introduce ourselves as one of the leading manufacturer of "STORAGE SYSTEMS, PALLETS & COMPACTORS (Mobile Shelving Systems) and RACKS SUPPORTED WAREHOUSE". We have Heavy & Light Duty Racking System made out of our cold roll for medsection, which can take a uniformly distributed maximum load upto 5000 kgs per shelf by use of modern material handling equipment's like forklifts etc. This system does not call for any welding at site, even the none is free to change the loading levels upwards or downwards in multiple of 50mm. We plan the system as per the customer need and space available. Our racks and compactor system are widely used for different material handling application generated at all levels in different industries and sectors be it Automobile, Pharmaceutical, Engineering, Hospitality & Catering, Logistics, Supermarkets, Electronics, Retails, Food and Beverages, Agriculture & Seafood etc.

PRODUCTS AND SERVICES

- Rack Supported Warehouse
- Mobile Racking System
- Cold Storage Racking
- Adjustable Pallet Racks
- Double Deep Racking System
- Drive-inRacks
- Radio Pallet Shuttle Racking System
- Shelving Long Span
- Cantilever Racks
- Mezzanine Floors (MultiTier)
- Multi Tier Shelving
- Boltless (Rivet) Shelving
- Lockers
- Compactors
- Steel Bins/Trolleys
- Steel Pallets
- Stackable Racks
- Material Handling Equipment's

HEAVY DUTY PALLET RACKS

Our Heavy Duty Pallet racking is generally laid out with single-entry wall racks on the perimeter sides and double-entry racks in the middle. The working aisle measurement between each rack and the rack height depends upon the characteristics of the fork-lift trucks or lifting devices, pallet size and the height of the warehouse itself.

HEAVY DUTY PANNEL RACKS

We are paramount in offering a wide range of Heavy Duty Steel PANNEL Racks. Our racks are especially designed by the professionals to fulfil various storage requirements of different industries. These products are available at competitive market prices and can be customized in various sizes & patterns as per the specifications mentioned by the valuable patrons.

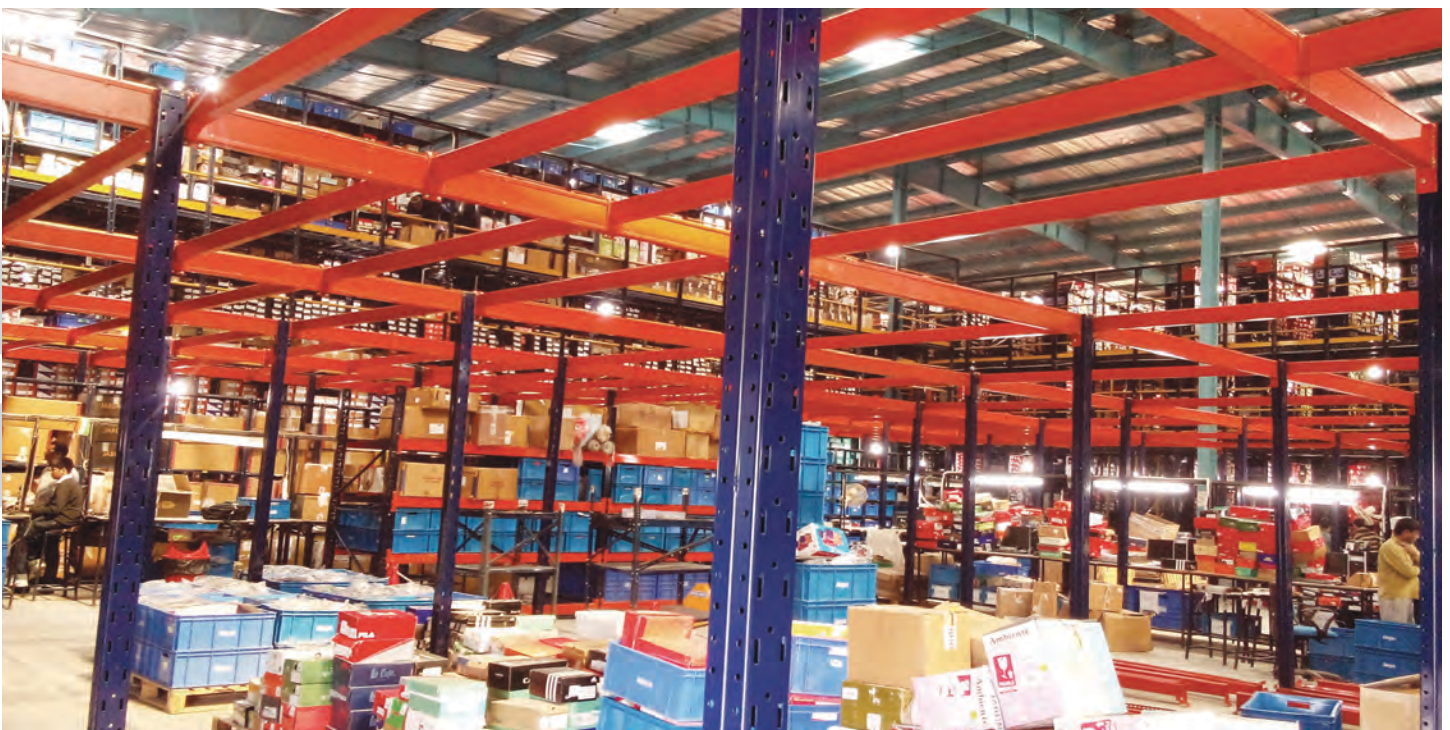

MODULAR MEZZANINE FLOOR

Mezzanine Floors are an ideal solution for increasing the floor space in offices and industries especially in metros where space is always a restricted resource. Modular Mezzanine Floors can help in expanding your production capacity & improving operating efficiency at your work place by creating additional office space or expanding your working area.

FEATURES :

- Stable new floor to hold additional storage
- Can be designed to offer the greatest clear space on the ground for additional activities/storage
- Enables you to maximize the usable height within your warehouse
- Reduces Cost of Construction by allowing efficient use of space
- Can be easily enlarged, modified, or moved
- No extra costs for heat, lights, or air conditioning
- Gives additional space without adding ratable value to your property.
- Two tier wide space racks

**DOLPHIN
STORAGE SOLUTIONS**

MULTI TIER MEZZANINE FLOOR

Our multi-tier mezzanine floors are capable of withstanding substantial loads, making them ideal for almost any function. We most commonly deploy multi-tier mezzanines for office space and storage, and can also deliver mezzanines with racking as part of the supporting structure.

LIGHT DUTY RACKS

The Light Duty Racks is an innovative design for light duty application, from a single bay of racking to a high bay racking installation Light Duty Storage Rack is suitable to prevent cargo damage and classify the products as per the need, which make management convenient. Offer excellent stability and practical appearance to increase the storage capacity of your facility

FIFO RACKING SYSTEM

The FIFO RACKING SYSTEM , also called Carton Flow Rack, permits high density storage of cartons and light products, leading to savings in space and improved stock turnover control.

As with the Carton Flow Rack system, perfect product rotation is ensured in this picking system by also following the FIFO (First in, First out) system, and interference is avoided by differentiating between the loading and unloading areas.

The Carton flow racking system reduces distances covered in the warehouse and saves operating time, so it perfectly adapts to warehouses with a large volume of manual picking operations.

MULTI-TIER RACKING

The Multi-tier Racking designed for warehouses with limited floor areas but available height, are manual storage solutions that maximize warehouse space. They offer an optimum use of height with the creation of different levels of manual loading aisles at different heights accessible by stairs.

ADJUSTABLE PALLET RACKS

The Adjustable Pallet Racking system (APR) is designed to store pallets in a mechanical and functional way using forklifts. These forklifts access goods through aisles parallel to the racks.

The use of adjustable pallet racks is a logistical solution which can be adapted to the dimensions of the unit loads and the forklifts. Efficient, resistant, easy-to-assemble, and with simple load level regulation, this system adapts to any type of product, both by weight and by volume. These systems can be adapted for picking.

COLD STORAGE RACKS AND MEZZANINE FLOOR

We intend to offer 'DOLPHIN STORAGE SOLUTIONS' for Cold Storage And Warehouses. With having completed several Racking AND MEZZANINE FLOOR projects so far we now have a good experience and confidence, we can offer a very optimum solution for Cold Storage. We hold specialization in offering an extensive range of 'DOLPHIN STORAGE SOLUTIONS' Racks AND MEZZANINE FLOOR that is manufactured using the progressive technology and high grade raw material procured from the trusted and reliable vendors of this industry. These racks are available in various designs and specifications.

We produce high quality DOLPHIN Cold storage Racks keeping in mind the diverse requirements of clients. Our Cold Storage Racking Systems are acclaimed among the clients for durable standards and high quality.

RACK SUPPORTED WAREHOUSE

The industrial sheds can be installed easily over modular structures. The sheds we manufacture come in with turbo ventilators which keep it airy and comfortable for workers. The structures are durable, having been tested for withstanding harsh weather conditions. The structures are pre engineered and made in factory conditions, which leaves minimal chances of construction error. The cost is competitive and provision for sky light is also provided.

WHY CHOOSE DOLPHIN AS MANUFACTURING VENDOR

- We build your building within budget and on schedule.
- We provide customized building solution as per the requirement.
- We reduce your total construction time by 40%
- We help you to reduce your electricity bill by 27%
- We Provide cost effective building solution through optimized design.
- We provide turnkey solution.
- We have automated machineries to fulfill clients requirement on time.

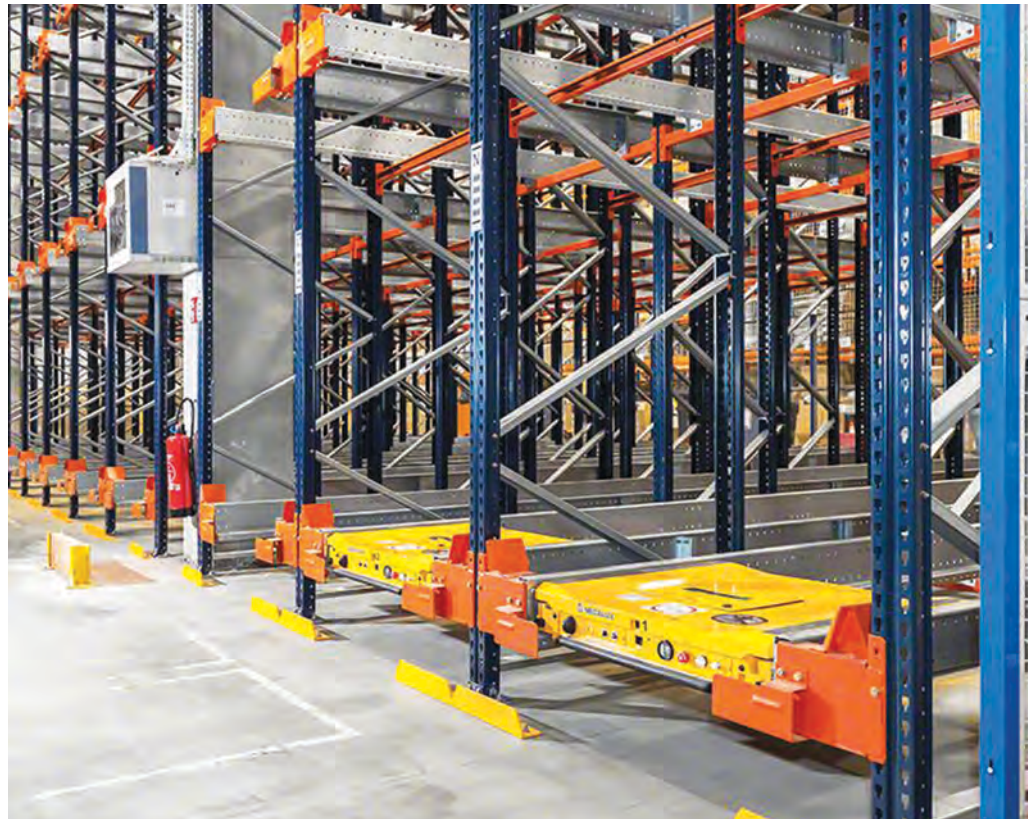

RADIO PALLET SHUTTLE RACKING SYSTEM

Radio shuttle is a semi-automated storage and retrieval system that allows for a maximum use of warehouse space. Easily managed with a remote control, the Radio shuttle pallet shuttle is loaded into storage loads and executes orders to load or unload pallets into a lane. The lanes are fed pallets by lift trucks such as reach trucks or sit down forklifts.

HOW IT WORKS

- At the heart of the advanced Radio Shuttle racking system is the Radio Shuttle Car. The low-profile car is designed to conveniently pass underneath pallets.
- Pallets are stored on specially designed pallet racking that is outfitted with guide rails and tracks to accommodate the Radio Shuttle Car.
- When the car arrives at the desired pallet, a platform raises to support the pallet and elevate it a few inches. The shuttle car then smoothly transports the pallet to the front of the racking system for easily removal of a pallet.
- The shuttle car is battery powered, which helps reduce emissions in your warehouse. The storage system comes complete with a battery, charger and remote control.

MOBILE RACKING SYSTEM

The Mobile Racking System is a system where racks are built on a mobile base and guided by rails on the floor. Driven by an electrical motor, the mobile base move along the rails to open one or more access aisle. The Mobile Racking System is a high-density storage system, by tapping into the vertical volumetric space, it reduces the warehouse footprint by 45% yet increases the storage capacity by up to 85%. Warehouse owners save on the total building cost of a new warehouse with a faster return of investment.

SLLOTTED ANGLE RACKS

WE ARE a well-recognized name in the markets, when it comes to manufacturing and supplying best quality Slotted angle racking system,. These products are made by premium quality raw materials. Our range includes a variety of designs and sizes to cater to the needs of different clients.

DISPLAY RACK

We are the most appreciated manufacturer of Display Racks and Shelves. Smooth finish, cost-effective rates, quality assurance, excellent design and strongly built texture are some factors that make these racks highly appreciated.

DOUBLE DEEP RACKING SYSTEM

Double Deep Pallet Racking is a storage system that is halfway between adjustable pallet racking systems and compact storage systems.

In double deep pallet racking, the unit loads are stored mechanically by forklifts that move along the aisles arranged in parallel to the racking systems.

DRIVE IN RACKS

The Drive in Racking System is a high density storage solution that maximizes available space and height in the warehouse by reducing the forklift operating aisles.

It is made up of an easy-to-assemble and -reset modular structure, which makes it easy to maintain.

Compact racking can be either Drive in racking, with only one access aisle, where the last load in is the first one out, or Drive through racking, with an entrance and exit, where the first load in is the first one out.

LONG SPAN RACKS

Long span shelving systems are always in demand, thanks to its flexibility, strength & cost-effectiveness, apart from being the ideal solution for the long run. Ideally suited for any type or size of goods, these racks do not occupy much of floor space; making it the best choice for retail and industrial houses with space constraints. Installing these shelving storage racks is simple and does not require expert help, and it can be quickly and easily assembled and disassembled.

CANTILEVER RACKS

Cantilever are a strong heavy duty storage shelving system. They are specifically designed for storing long and bulky items or materials such as lumber, plywood, PVC, steel pipe and metal or bar stock pipes, and more. For this reason, cantilever storage rack is the preferred solution for storing heavy duty items such as furniture, boats, steel bar stock, pvc pipe, iron pipe and a wide array of long, bulky and/or heavy items.

BOLTLESS RACKS

DOLPHIN Boltless (Rivet) Shelving offers an economical solution to any storage need, from the small back room to the multi-level archive storage system. Part interchangeability and easy assembly are only two of the many reasons why DOLPHIN Boltless (Rivet) Shelving can solve Storage problems and save money. We call DOLPHIN Boltless (Rivet) Shelving the Universal Shelf Framing System because so many storage requirements can be met by only a few simple components. DOLPHIN Boltless (Rivet) Shelving is engineered to provide safe, economical storage of virtually any type of hand loaded material.

INDUSTRIAL LOCKER

OUR STANDARD MODELS

Lockers	Outer Dimensions (mm)	Inner Dimensions (mm) of 1 Locker
6 Doors	1900(H) x 380(D) x 915(W)	255(W) x 875(H) x 380(D)
9 Doors	1900(H) x 380(D) x 915(W)	255(W) x 575(H) x 380(D)
12 Doors	1900(H) x 380(D) x 915(W)	255(W) x 425(H) x 380(D)
15 Doors	1900(H) x 380(D) x 915(W)	255(W) x 335(H) x 380(D)
18 Doors	1900(H) x 380(D) x 915(W)	255(W) x 275(H) x 380(D)

MOBILE COMPACTORS

DOLPHIN offer mobile compactor storage system, MS mobile compactor and space adapter products manufactured with high quality raw materials in accordance with industry standards. We maintain standards and production quality with highly qualified engineers and workers in our complete mobile compactor storage system manufacturing station.

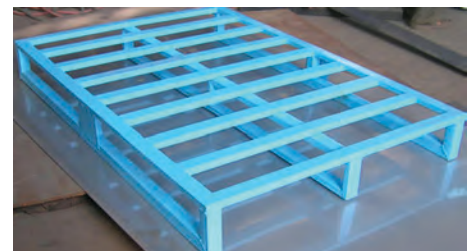

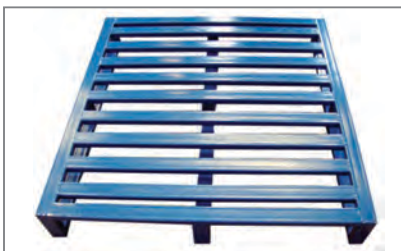

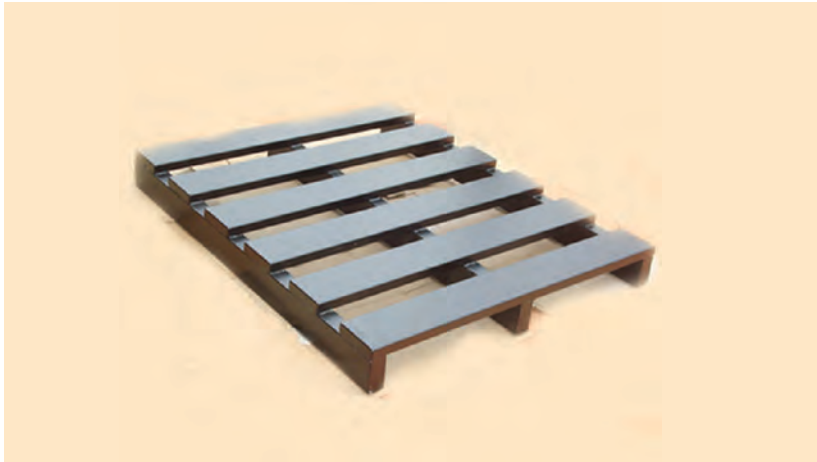

We manufacture all types of mobile rack storage systems, such as

1. Push and Pull : This is manually operated.
2. Chain driven : it is automated and mechanically operated.

METAL BIN BOX AND TROLLEY

METAL PALLET

STACKABLE RACKS

For maximum utilization of space we offer a wide range of DOLPHIN Stackable Racks. These are manufactured using superior quality raw material (high tensile strength steel) and can easily store large and bulky items. Durable and precision engineered, our range can store commodities of different sizes.
